

Making the Impassable Possible.

Anchor Master®

*High-Performance Tools for
the Fully Amphibious Utility Vehicle*

- **Powerful**

Produces 5500 ft/lbs of torque.

- **Versatile**

Fully amphibious unit capable of setting distribution or transmission anchors vertically and at desired angles. Provides access to swamps, marshes and wetland terrain inaccessible by other equipment.

- **Cost Effective**

Low-cost alternative to traditional methods such as matting. Low ground pressure minimizes environmental impact.
