

Making the Impassable Possible.

Amphibious Backhoe

*High-Performance Tools for
the Fully Amphibious Utility Vehicle*

by

- **Powerful** Compact and capable unit excels in small wetland excavation projects.
- **Versatile** Fully amphibious unit ideal for projects in swamps, marshes and wetland terrain inaccessible by other equipment.
- **Cost Effective** Low-cost, highly mobile alternative to traditional excavation equipment. Mounts easily to the MM-2LX, utilizing the Marsh Master proprietary 3-point hitch system and hydraulic system. Low ground pressure minimizes environmental impact.
