

Making the Impassable Possible.

AMPHIBIOUS CUTTER

*High-Performance Tools for
the Fully Amphibious Utility Vehicle*

- **Powerful**

Two heavy-duty rotary blades cut a 76" swath through deep underbrush and tall marsh grasses.

- **Versatile**

Fully amphibious capability allows access to swamps, marshes and wetland terrain inaccessible by other equipment.

- **Cost Effective**

Practical alternative to costly aerial herbicide applications or mowing operations in wetland areas inaccessible to non-amphibious equipment. Low ground pressure minimizes rutting or damage to sensitive wetland areas.
